

Motor Trend Cars

Fuel efficiency

The dataset contains 32 cars. Of these, 14 were classified as high efficiency, defined as achieving more than 20 miles per gallon.

Figure 1 shows the relationship between vehicle weight and fuel efficiency. Heavier cars consistently achieve lower mileage, with high-efficiency cars concentrated at the lower end of the weight range.

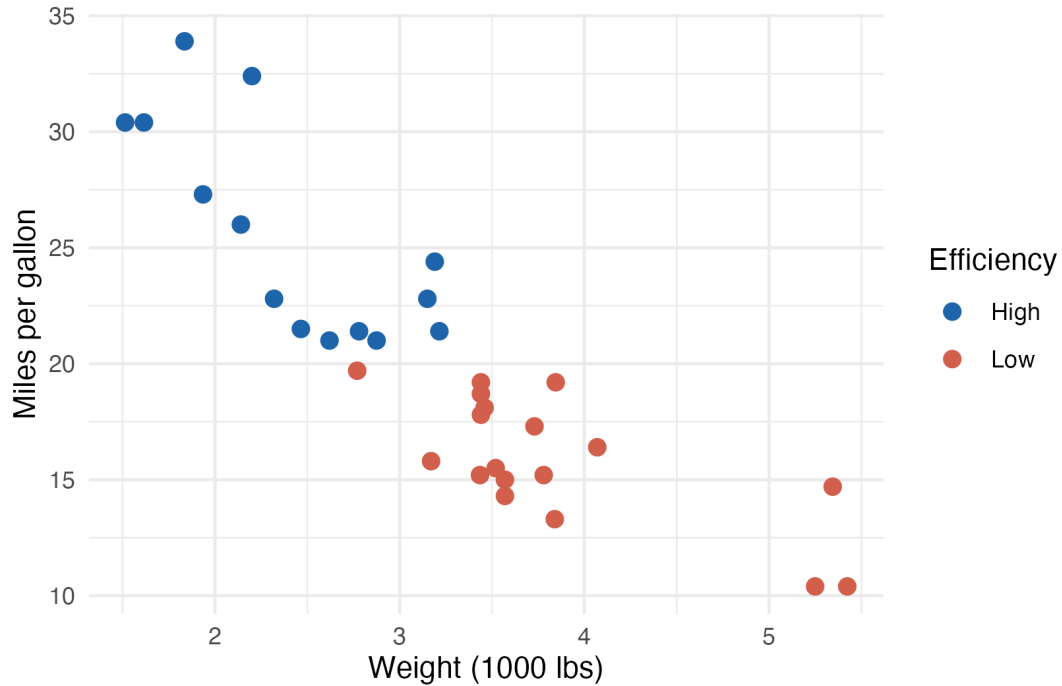

Figure 1: Miles per gallon by vehicle weight and efficiency class.

Summary by cylinder count

Table 1 presents mean fuel efficiency, horsepower, and weight broken down by number of cylinders.

Cylinders	Mean MPG	Mean HP	Mean weight	N
4	26.7	83	2.29	11
6	19.7	122	3.12	7
8	15.1	209	4.00	14

Table 1: Mean statistics by cylinder count.
